D.O.B: 15th December 2000

Father's Name: Mr. Rishi Kumar Gautam

Mother's Name: Mrs. Krishna Gautam

OVERVIEW

Results-oriented and detail-driven Project Manager and Full Stack Developer with 2+ years of experience delivering high-performance, scalable web applications and managing cross-functional teams through the full software development lifecycle (SDLC). Proficient in React.js, Node.js, Python, WordPress, Shopify, and modern database systems including MySQL and MongoDB. Demonstrated success in leading Agile/Scrum-based projects, integrating RESTful APIs, and deploying responsive, user-focused solutions on time and within budget. Strong background in technical planning, stakeholder communication, and quality assurance. Adept at aligning business goals with technical strategies to deliver measurable results and enhance customer satisfaction. Seeking to leverage full-stack development expertise and project management skills to drive innovation and contribute to dynamic development teams.

WORK EXPERIENCE

Project Manager

Cargaison Logistics Express   May, 2024 - Present

- Lead and mentor a team of full-stack developers, fostering collaboration, conducting code reviews, and driving continuous improvement in development practices.
- Actively contribute to front-end and back-end development, building scalable, high-performance applications using Next, React, Node.js, Wordpress and Shopify.
- Serve as the primary point of contact for clients, ensuring clear communication, managing expectations, delivering high-quality products, and overseeing timely invoicing and payment collection to maintain project profitability and client satisfaction.

Full Stack Developer

Cargaison Logistics Express   Apr, 2023 - May, 2024

- Serve as a Full Stack Developer, managing the complete software development lifecycle—from architecture planning to deployment and maintenance.
- Developed a robust Trucking Management System (TMS) using PostgreSQL, NestJS, Next.js, and WebSocket, significantly improving operational workflows and real-time communication within the logistics company.
- Lead the design and development of responsive websites and dynamic web applications, ensuring performance, accessibility, and user-centric experiences across platforms.
- Handle private server infrastructure, ensuring secure deployment, system optimization, real-time monitoring, and automated backup processes for seamless application delivery.

Project Intern

HighRadius   Jan, 2022 - Apr 2022

- Designed, developed, and deployed a cloud-based B2B Fintech application integrating AI-driven analytics to optimize financial workflows and decision-making processes.
- Conducted testing, debugging, and performance monitoring of application modules using cloud services (e.g., AWS, Azure), ensuring scalability, data security, and compliance with Fintech industry standards.

Frontend Web Developer

MentHub Canada   Oct, 2021 - Jan 2022

- I designed, developed, and deployed a cryptocurrency counselor website collaborating closely with the stakeholders.
- Continuous communication and iterative improvements resulted in a user-centric solution empowering informed investment decisions in the dynamic cryptocurrency landscape.

PROJECTS

Advanced Video Surveillance System

Programming Language: Python

- Libraries: OpenCV-python, pycaw, Mediapipe, cmake, dlib, numpy, tensorflow, etc.
- Achievement: 2nd place at Techinvent, Chandigarh University.

AI Enabled Fintech B2B Cloud Application

Frameworks: Express.js, NextJS

- Use Cases: Backend and real-time data processing, especially for high-performance cloud applications.
- Achievement: Internship Project at High Radius.
